

Akumina EXP Mobile App

Secure. Personalized. Connected.

Empower Employees Anywhere.

The **Akumina EXP Mobile App** extends your digital workplace beyond the desktop, giving employees secure access to the information and resources they need- whether they're in the office, working remotely, or on the front line.

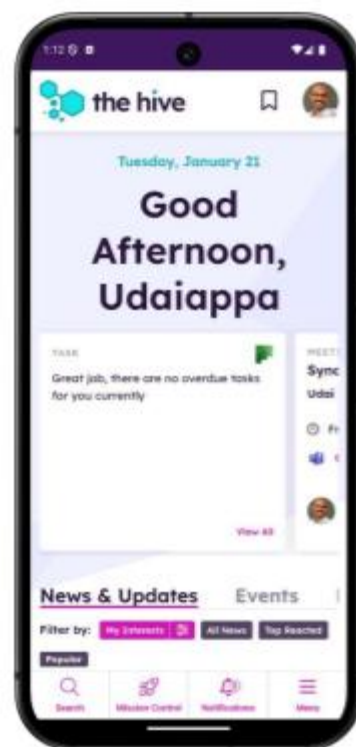

Built on Microsoft 365, the mobile experience mirrors your Akumina intranet while providing a streamlined, mobile-first interface designed for engagement and productivity.

Key Business Benefits

- Extend your intranet to iOS and Android devices
- Keep employees informed with targeted communications
- Support hybrid and frontline workforces
- Deliver timely push notifications and Broadcast Center messages
- Secured managed access with Microsoft Intune (MDM/MAM) support
- Increase employee engagement and digital workplace adoption
- Maintain a consistent experience across desktop and mobile, including organizational branding

Mobile Experience Highlights

- Personalized Home Page
- News, Blogs, and Events
- Department Sites
- Enterprise Search
- AI Search Experience*
- Deep Linking (direct navigation from notifications and links into specific app content)
- People Directory and Employee Profiles
- Documents and Resource Libraries
- Forms and Quick Links
- Favorites and Personalized Navigation
- Broadcast Communications
- Push Notifications

**Available with supported Akumina AI capabilities and Microsoft licensing*

AI-Powered Search & Discovery

With Akumina AI capabilities enabled, employees can quickly find information using natural language search while benefiting from:

- AI-generated search summaries
- Personalized content recommendations
- Microsoft Graph-powered knowledge retrieval
- Microsoft Copilot integration
- Connected enterprise knowledge sources

Enterprise Security

The Akumina EXP Mobile App leverages Microsoft enterprise security, including:

- Microsoft Entra ID Single Sign-On (SSO)
- Multi-Factor Authentication (MFA)
- Conditional Access
- Secure Microsoft Graph integration
- SharePoint security trimming
- OAuth authentication with encrypted communications

Employees only see the content they are authorized to access.

Mobile Device Management (MDM) and BYOD Support

Akumina integrates with Microsoft Intune to support both corporate-owned and personal devices. Organizations can choose:

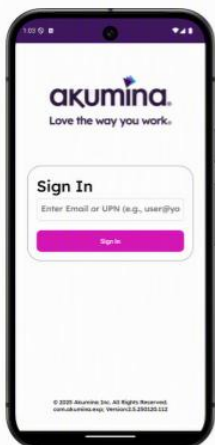

Mobile Device Management (MDM)

- Manage and secure corporate-owned devices
- Enforce compliance policies
- Deploy applications centrally
- Remotely lock or wipe lost devices

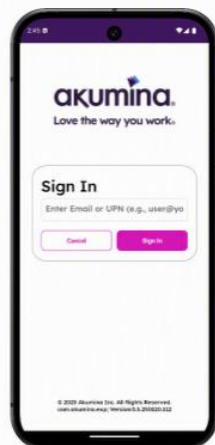

Mobile Application Management (MAM)

- Secure only the Akumina app and corporate data
- Protect business information on personal devices
- Support Bring Your Own Device (BYOD)
- Selectively remove corporate data while preserving personal content

Default login page when pre-login is not configured

Login page when pre-login enabled. Cancel button will take to pre-login page

Designed for Employees

The mobile application is optimized for content consumption and employee engagement, rather than content authors.

Employees can easily access information, search for resources, and stay informed from anywhere, while content creation, publishing, workflow management, and site administration continue through the Akumina desktop experience.

Mobile Analytics

Organizations can measure adoption and engagement through Akumina analytics, including:

- Active mobile users
- Most-viewed content
- Search activity
- Broadcast engagement
- Push notification interactions
- Popular resources and pages

These insights help optimize communications and measure digital workplace success.

App Availability

- Apple App Store
- Google Play Store

Compatible with iPhone, iPad, Android phones, and Android tablets.

Microsoft 365 Integration

Akumina seamlessly integrates with:

- Microsoft Entra ID
- Microsoft Graph
- SharePoint Online
- Microsoft Search
- Microsoft Teams
- Microsoft Copilot*
- OneDrive
- Exchange (where applicable)

**Where licensed and configured*
